Mean, Median and Mode

Three ways to say what is typical.

Mean: even it out (a fair share)

Move dots from the tall towers to the short ones.
Now every tower has 5.

20 ÷ 4 = 5

Median: the middle one, in order

9, 2, 7, 4, 12 → 2, 4, 7, 9, 12

7 is in the middle. Two in the middle? Take the number halfway between them.

Mode: the one that comes up most. Range: biggest – smallest.

3, 5, 5, 8, 9: mode 5, range 9 – 3 = 6

Your turn!

mean of 4, 8, 9 = 7

For teachers

Goal: mean as a fair share, median, mode and range (6.SP.3, 6.SP.5c). Say “If we shared them out evenly, how many each?” For the median, always put the numbers in order first.

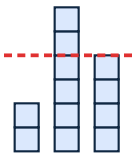

Mean, Median and Mode: Practice

Even it out, find the middle, find the most.

Part 1 Even it out

Move cubes until the towers match.

1)

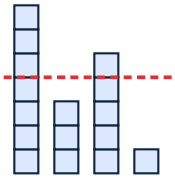

in all: 12

12 ÷ 3 = 4

in all: 18

18 ÷ 3 = 6

mean = 6

4)

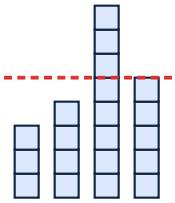

in all: 20

20 ÷ 4 = 5

mean = 5

5)

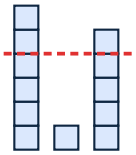

in all: 20

20 ÷ 4 = 5

mean = 5

6)

in all: 12

12 ÷ 3 = 4
