Mean, Median and Mode

Three ways to say what is typical.

Mean: even it out (a fair share)

Move dots from the tall towers to the short ones.
Now every tower has 5.

$20 \div 4 = 5$

Median: the middle one, in order

9, 2, 7, 4, 12 → 2, 4, 7, 9, 12

7 is in the middle. Two in the middle? Take the number halfway between them.

Mode: the one that comes up most. Range: biggest – smallest.

3, 5, 5, 8, 9: mode 5, range 9 − 3 = 6

Your turn!

mean of 4, 8, 9 = ☐

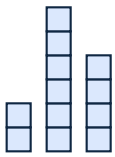

Mean, Median and Mode: Practice

Even it out, find the middle, find the most.
