Data Displays

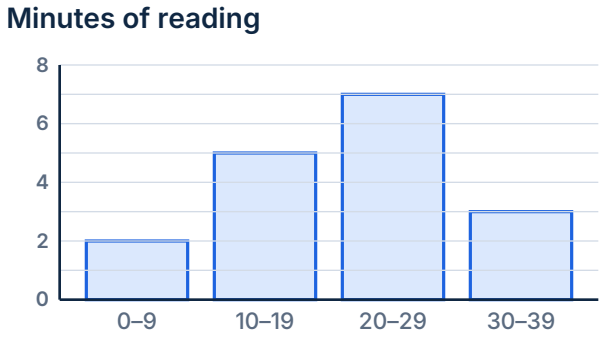

Ask a question with many answers. Then show the data.

A statistics question expects different answers

“How tall are the kids in my class?” Yes: many answers.

“How tall is Mia?” No: one answer.

A histogram: count the data in equal groups

Each bar is a group of numbers.

7 kids read 20 to 29 minutes.

The bars touch: the groups follow on.

One far-off number pulls the mean, not the median

2, 3, 3, 4, 28: mean 8, median 3

Your turn!

1, 4, 4, 6, 15: mean = ☐ and median = ☐

Data Displays: Practice

Group the data. Show it. Read it.
