Halves, Thirds and Fourths

Equal shares are the same size.

Fair to share? The shares must be the same size.

equal

equal

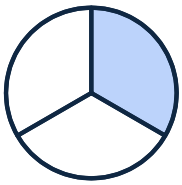

not equal

Name the shares

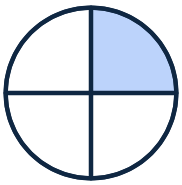

1 half

2 halves make 1 whole

1 third

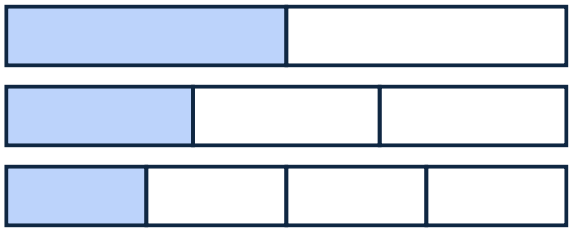

3 thirds make 1 whole

1 fourth

4 fourths make 1 whole

More shares, smaller shares

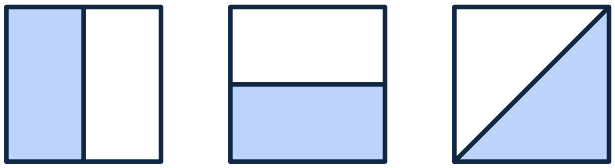

1 half

1 third

1 fourth

Cut the same bar into more shares: each share gets smaller.

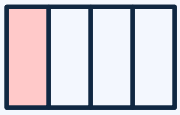

Halves can look different

Each square is cut in half. Each shaded part is 1 half.

Your turn!

Shade 1 fourth.

4 fourths make 1 whole

For teachers

Goal: cut shapes into 2, 3 or 4 equal shares and name them (2.G.3). Ask “Are the shares the same size?” before naming them. Say “the more shares, the smaller each share,” so 1 fourth is smaller than 1 half. No fraction numbers (½) yet.

Halves, Thirds and Fourths: Practice

Equal shares first. Then name them.

Part 1 Equal shares? Are all the shares the same size? Circle yes or no.

132) 58 + 10 = 68

133) half of 92 = 46

134) 6 + 6 + 6 = 18

Part 16 Word problems Draw the shapes. Share them fairly.

135) Ava and Ben share a sandwich fairly. How much of the sandwich does each one get?

Number sentence 1 half + 1 half = 1 whole

Answer half of the sandwich

136) 4 kids share a pizza fairly. Each kid gets 1 fourth. How many fourths make the whole pizza?

Number sentence 4 fourths = 1 whole

Answer 4 fourths

Draw or show your work

137) Dad cuts a cake into 3 equal shares. You eat 1 share. How many shares are left?

Number sentence 1 third + 2 thirds = 1 whole

Answer 2 thirds
