Line Plots with Fractions

Put an X for each one. Then add and take away fractions.

8 bugs, measured to the eighth of an inch

6/8 in	7/8 in	7/8 in	1 in
1 1/8 in	1 1/8 in	1 1/8 in	1 3/8 in

Bug lengths (inches)

Questions you can answer

Longest minus shortest: $1\frac{3}{8} - \frac{6}{8} = \frac{5}{8}$ in

All the 1 1/8 in bugs end to end: $3 \times 1\frac{1}{8} = 3\frac{3}{8}$ in

How many are shorter than 1 in? **3 bugs**

Your turn!

Longest 1 2/8 in, shortest 5/8 in.

$$1\frac{2}{8} - \frac{5}{8} = \frac{\boxed{5}}{8}$$

For teachers

Goal: X charts (line plots) of measurements in halves, quarters and eighths, then add and subtract the fractions to answer questions (4.MD.4). Say “Find the biggest and smallest X first.”
