Angles

An angle is a turn between two rays. We measure it in degrees.

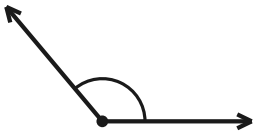

A full turn is 360 degrees. A square corner is 90.

right: 90°

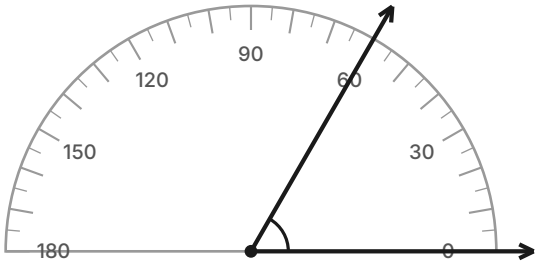

acute: under 90°

obtuse: over 90°

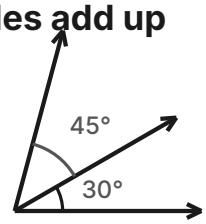

Read a protractor

1. Put the dot on the vertex.
2. Line up one ray with 0.
3. Read where the other ray crosses.

60 degrees

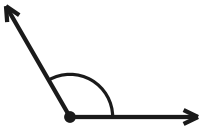

Angles add up

30 + 45 = ☐ degrees

Two angles side by side: add their degrees.

Part 10 Word problems Draw the angles.

87) A door opens 30 degrees, then 45 degrees more. How far has it opened?

Number sentence _____

Answer ☐ degrees

Draw or show your work

88) The hands of a clock make a square corner at 3:00. How many degrees is that?

Number sentence _____

Answer ☐ degrees

Draw or show your work

89) A skater turns half a circle. How many degrees does she turn?

Number sentence _____

Answer ☐ degrees

Draw or show your work

90) A pizza slice has a 60 degree corner. How many slices fit around the whole pizza?

Number sentence _____

Answer ☐ slices

Draw or show your work

91) Challenge: Two angles make a straight line. One is 115 degrees. How big is the other?

Number sentence _____

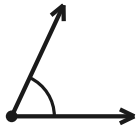

Answer ☐ degrees

Draw or show your work
