Adding and Subtracting Decimals

Line up the points. Add tenths to tenths, hundredths to hundredths.

3.45 + 2.7

$$\begin{array}{r} 3.45 \\ +\ 2.70 \\ \hline 6.15 \end{array}$$

Points under points.
2.7 is 2.70: the gray 0 fills the empty place.
4 tenths + 7 tenths = 11 tenths:
write 1, carry 1 to the ones.

3.45 + 2.7 = 6.15

5 – 1.38

$$\begin{array}{r} 5.00 \\ -\ 1.38 \\ \hline 3.62 \end{array}$$

5 is 5.00. Write the zeros first.
Then subtract like whole numbers:
500 hundredths − 138 hundredths.

5 – 1.38 = 3.62

Your turn!

4.6 + 2.85 = 7.45

For teachers

Goal: add and subtract decimals to hundredths (5.NBT.7). Say “Points under points. Fill empty places with 0.” Then it works like whole numbers: add or take away each place, and regroup 10 of a place.

Adding and Subtracting Decimals: Practice

Points under points. Empty places get a 0.

Part 1 Line up the points

The gray zeros fill the empty places.

1) $2.40 + 1.35 = 3.75$

2) $6.80 - 2.53 = 4.27$

5) $5.06 + 1.90 = 6.96$

6) $7.30 - 0.48 = 6.82$

Part 2 Add in columns

Write any zeros you need.

7) $3.72 + 4.5 = 8.22$

8) $0.86 + 2.47 = 3.33$

10) $4.09 + 0.95 = 5.04$

11) $7.5 + 6.75 = 14.25$

12) $1.64 + 8.7 = 10.34$
