# Multiplying Fractions

A fraction of a fraction: cut one way, then the other way.

## 1/2 × 2/3: half of two thirds

Cut the square into 3 rows: shade 2 of them (2/3).
Cut it into 2 columns: take half of the shaded part.
The square now has 6 pieces. 2 are in both.

$$\frac{1}{2} \times \frac{2}{3} = \frac{2}{6}$$

## Without a picture: tops times tops, bottoms times bottoms

$$\frac{2}{3} \times \frac{4}{5} = \frac{8}{15}$$

2 × 4 = 8 pieces are in both.
3 × 5 = 15 pieces in the whole square.

## Smaller or bigger?

$$\frac{3}{4} \times 8 = 6$$

Times a fraction less than 1: the answer is smaller than 8.

$$1\frac{1}{2} \times 8 = 12$$

Times more than 1: the answer is bigger than 8.

**Your turn!**

$$\frac{1}{3} \times \frac{3}{4} = \frac{\square}{\square}$$

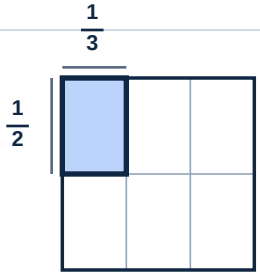

# Multiplying Fractions: Practice

Read × as “of”. Tops times tops, bottoms times bottoms.
