Volume

How many unit cubes fill the box? Count one layer, then the layers.

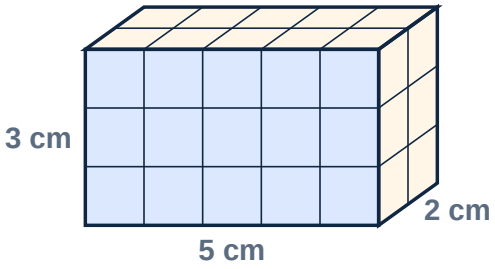

A box 4 cubes long, 3 cubes wide, 2 cubes tall

One layer: 4 rows of 3 = 12 cubes.
2 layers: 12 + 12 = 24 cubes.
Volume is how many cubes fill it.

4 × 3 × 2 = 24 cubes

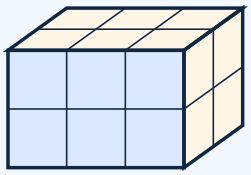

Length × width × height

Each cube is 1 cm on every edge: a cubic cm.
Base: 5 × 2 = 10 squares. Height: 3 layers.

5 × 2 × 3 = 30 cubic cm

Your turn!

volume = 12 cubes

For teachers

Goal: volume as counting unit cubes, then length × width × height (5.MD.3–5). Say “How many cubes in one layer? How many layers?” Units are cubic: cubic cm, cubic m.
