Dividing with Unit Fractions

Share a piece, or count how many pieces fit.

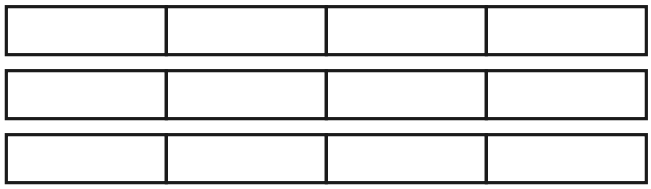

1/3 ÷ 2: share one third between 2 people

Cut every third into 2.
Now the whole has 6 pieces.
Each person gets 1 of them.

$$\frac{1}{3} \div 2 = \frac{1}{6}$$

3 ÷ 1/4: how many fourths fit in 3 wholes?

Each whole has 4 fourths.
3 wholes have 3 × 4 = 12 fourths.

$$3 \div \frac{1}{4} = 12$$

Check with times

$$\frac{1}{6} \times 2 = \frac{2}{6} = \frac{1}{3}$$

$$12 \times \frac{1}{4} = \frac{12}{4} = 3$$

Your turn!

$$\frac{1}{2} \div 4 = \frac{\boxed{1}}{\boxed{8}}$$

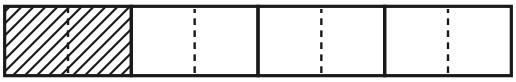

For teachers

Goal: divide a unit fraction by a whole number and a whole number by a unit fraction (5.NF.7). Say “Share the piece: cut it smaller” and “How many pieces fit?” No flip-and-multiply rule.
