Ratios

A ratio compares two amounts: for every 3 of these, 2 of those.

3 circles for every 2 squares

3 : 2 Say “3 to 2”. Two groups is 6 : 4, the same ratio.

A ratio table: multiply both rows by the same number

cups of flour	2	4	6	8
eggs	3	6	9	12

× 2, × 3, × 4:
both numbers change together.

Part to part, part to whole

A class has 3 boys for every 5 girls. Boys to girls is 3 : 5.
Out of every 8 kids, 3 are boys. Boys to all kids is 3 : 8.

Your turn!

$$4 : 5 = 12 : \boxed{15}$$

For teachers
Goal: ratio language, equal ratios and ratio tables (6.RP.1, 6.RP.3a). Say “For every 3 of these there are 2 of those.” A ratio table multiplies both rows by the same number.
