Negative Numbers

Below zero, the numbers get colder.

Read the thermometer

Above 0 the numbers are positive: 5, 10, 15.

Below 0 they are negative. We write a minus sign:

6 below zero is written −6.

The lower it is, the colder: −10 is colder than −6.

This one shows −6 degrees.

Opposites and distance from 0

The opposite of 4 is −4. | −4 | = 4

Opposites are the same distance from 0, one above and one below.
The bars | | mean: how far from 0? It is never negative.

Your turn!

−3 ☐ −9
