Counting Fractions

Count the pieces. 3 pieces of 1/4 is 3/4.

Put unit fractions together

Count by fourths

Top number: how many pieces.

Bottom number: how many equal parts make the whole.

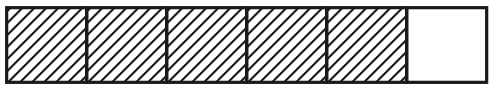

4 pieces of 1/4 fill the bar: that's the whole.

Say it in words

$\frac{2}{3}$ two thirds

$\frac{5}{8}$ five eighths

Your turn!

$\frac{5}{6}$

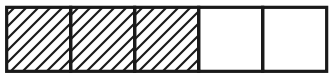

For teachers

Goal: a/b is a pieces of size 1/b (3.NF.1). Point at each piece and count: “one fourth, two fourths, three fourths.” The top number counts pieces; the bottom number names their size.

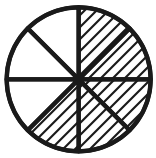

Counting Fractions: Practice

Top: how many pieces. Bottom: how many equal parts in the whole.
