Fractions and Wholes

All the pieces make 1 whole. More pieces go past 1.

All the pieces: 1 whole

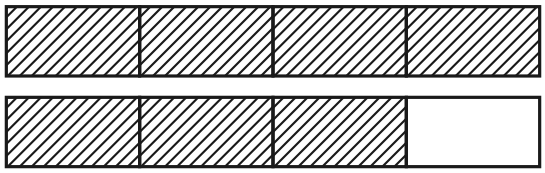

$\frac{4}{4} = 1$

$\frac{6}{6} = 1$

Top and bottom the same? Then it's 1 whole.

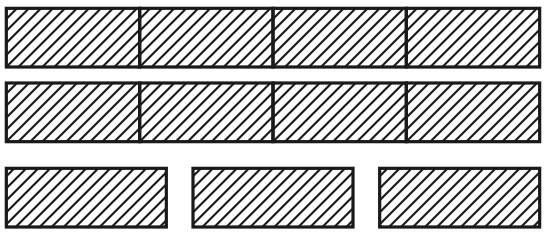

More than 1 whole

$\frac{7}{4} = 1 \text{ whole and } \frac{3}{4}$

Count on past 4/4: 5/4, 6/4, 7/4.

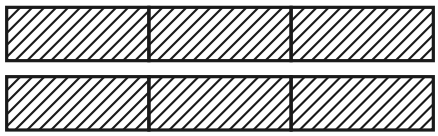

Whole numbers are fractions too

$\frac{8}{4} = 2$ 8 fourths fill 2 bars.

$\frac{3}{1} = 3$ 3 pieces, each a whole.

Your turn!

$\frac{6}{3} = 2$

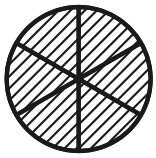

For teachers

Goal: b/b = 1, fractions bigger than 1, and whole numbers as fractions (3.NF.3c). Say "How many pieces make one whole bar? Count on past it." No mixed-number rules yet: 7/4 is 1 whole and 3/4.

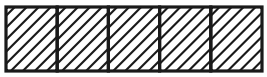

Fractions and Wholes: Practice

When the top number matches the bottom, that's 1 whole.

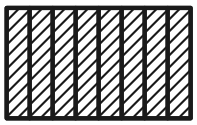

Part 1 One whole Every part is shaded. How many pieces?
