All Four Operations

Two-step problems with +, −, × and ÷. Draw the bar.

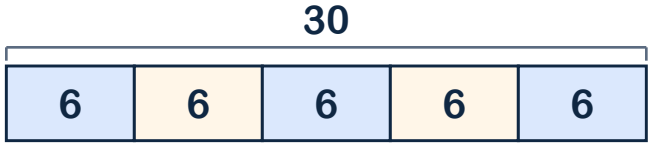

4 bags with 6 apples in each: equal pieces

$4 \times 6 = 24$

Know the pieces? Multiply.

30 stickers shared by 5 kids

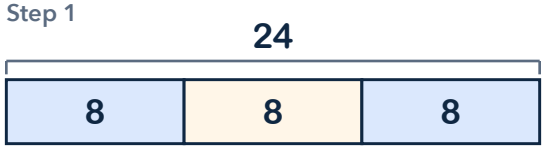

$30 \div 5 = 6$

Know the whole? Divide.

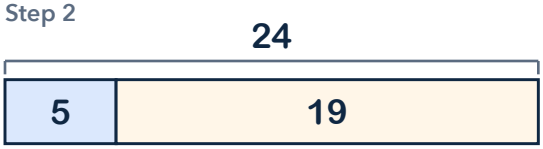

Two steps: 3 packs of 8 pencils. 5 get lost. How many are left?

Step 1

$3 \times 8 = 24$

Step 2

$24 - 5 = 19$

Does it make sense? Round to check.

$38 + 47 = 85$ about $40 + 50 = 90$

85 is close to 90, so it makes sense. 58 would not.

Your turn!

5 × 7 = 35

For teachers

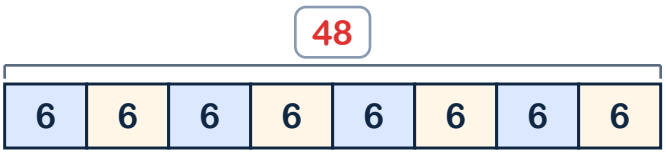

Goal: two-step problems with +, −, × and ÷ (3.OA.8). Equal pieces mean × (whole missing) or ÷ (a piece missing). Solve step 1, then use it in step 2. Round to check the answer makes sense.

All Four Operations: Practice
