Equivalent Fractions

Cut every piece the same way: more pieces, same amount.

2/3: cut every piece into 4

$$\frac{2}{3} = \frac{8}{12}$$

4 times as many pieces, and 4 times as many shaded.

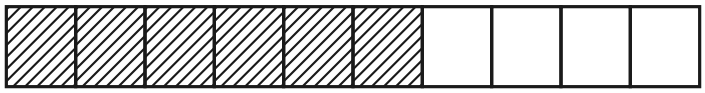

Multiply the top and the bottom by the same number

top: $2 \times 4 = 8$

bottom: $3 \times 4 = 12$

$$\frac{2}{3} = \frac{8}{12}$$

Divide to get bigger pieces

$$\frac{6}{10} = \frac{3}{5}$$

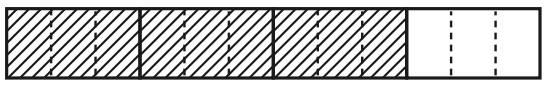

Put the pieces in pairs: top ÷ 2 and bottom ÷ 2.

Hundredths: tenths cut into 10

$$\frac{3}{10} = \frac{30}{100}$$

Every tenth is 10 hundredths.

Your turn!

$$\frac{3}{4} = \frac{9}{12}$$

For teachers

Goal: equivalent fractions by multiplying or dividing the top and bottom by the same number (4.NF.1). Say "Cut every piece into 4. How many pieces now? How many are shaded?"

Equivalent Fractions: Practice

Do the same to the top and the bottom.

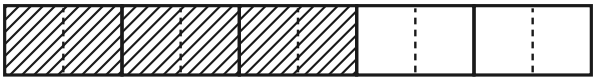

Part 1 Cut the pieces Count the small pieces, then the shaded ones.

1) Each piece is cut into 4.

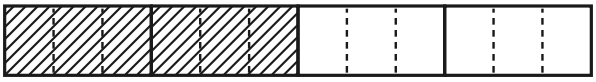

$\frac{1}{3} = \frac{4}{12}$

2) Each piece is cut into 2.

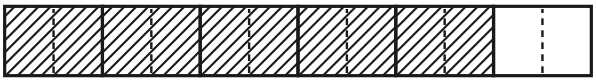

$\frac{3}{5} = \frac{6}{10}$

3) Each piece is cut into 3.

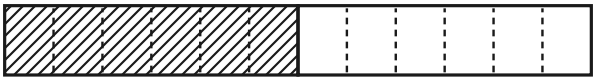

$\frac{2}{4} = \frac{6}{12}$

4) Each piece is cut into 2.

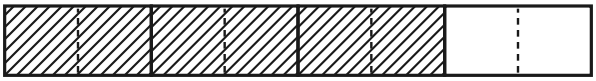

$\frac{5}{6} = \frac{10}{12}$

5) Each piece is cut into 6.

$\frac{1}{2} = \frac{6}{12}$

6) Each piece is cut into 2.

$\frac{3}{4} = \frac{6}{8}$

Part 2 Times the top and the bottom Multiply both by the number shown.

7) times 2: $\frac{2}{5} = \frac{4}{10}$

8) times 3: $\frac{1}{4} = \frac{3}{12}$

12) times 10: $\frac{3}{10} = \frac{\boxed{30}}{\boxed{100}}$

13) times 6: $\frac{1}{2} = \frac{\boxed{6}}{\boxed{12}}$

14) times 20: $\frac{4}{5} = \frac{\boxed{80}}{\boxed{100}}$

15) times 2: $\frac{1}{6} = \frac{\boxed{2}}{\boxed{12}}$

16) times 10: $\frac{9}{10} = \frac{\boxed{90}}{\boxed{100}}$
