Powers of Ten

Times 10: every digit moves one place to the left.

34 × 10 = 340

thousands	hundreds	tens	ones		tenths	hundredths	thousandths
		3	4	.			
	3	4	0	.			

Each digit is worth 10 times as much, so it moves one place left.
The empty ones place gets a 0.

4.6 ÷ 10 = 0.46

			4	. 6		
			0	. 4	6	

Divide by 10: one place right.
Divide by 100: two places right.

Powers of ten: how many 10s you multiply

$10^2 = 10 \times 10 = 100$

$10^3 = 10 \times 10 \times 10 = 1{,}000$

$10^4 = 10{,}000$

The small number says how many 10s, and how many zeros.

Your turn!
