Thousandths

Cut a hundredth into 10 equal parts. Each part is a thousandth.

1 hundredth = 0.01 1 thousandth = 0.001

10 thousandths = 1 hundredth
100 thousandths = 1 tenth
1,000 thousandths = 1 whole

2.457 in the place-value chart

thousands	hundreds	tens	ones		tenths	hundredths	thousandths
			2	.	4	5	7

The 7 is in the thousandths place, so it is worth 0.007.

$$2 + 0.4 + 0.05 + 0.007 = 2.457$$

Say it

2.457 = two and four hundred fifty-seven thousandths

Say the whole number, then “and” for the point, then the digits after it and the last place: 0.06 = six hundredths, 0.045 = forty-five thousandths.

Your turn!

in 5.382 the 8 is worth ____
