Equal Fractions

Different pieces, same amount.

The fraction wall

Follow the dashed line:

$$\frac{1}{2} = \frac{2}{4} = \frac{3}{6} = \frac{4}{8}$$

Same length, so they are equal fractions.

Cut every piece in two

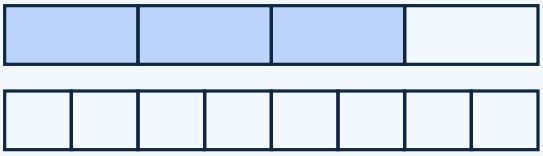

$$\frac{1}{3} \quad \frac{2}{6}$$

Twice as many pieces, each half as big.

$$\frac{1}{3} = \frac{2}{6}$$

Your turn!

$$\frac{3}{4} = \frac{\square}{8}$$
