Patterns in the Times Table

Look for patterns. They help you remember the facts.

The times table

×	1	2	3	4	5	6	7	8	9	10
1	1	2	3	4	5	6	7	8	9	10
2	2	4	6	8	10	12	14	16	18	20
3	3	6	9	12	15	18	21	24	27	30
4	4	8	12	16	20	24	28	32	36	40
5	5	10	15	20	25	30	35	40	45	50
6	6	12	18	24	30	36	42	48	54	60
7	7	14	21	28	35	42	49	56	63	70
8	8	16	24	32	40	48	56	64	72	80
9	9	18	27	36	45	54	63	72	81	90
10	10	20	30	40	50	60	70	80	90	100

Row 4 is all even:
4 × anything is even.

3 × 7 and 7 × 3 match:
turnarounds mirror across the table.

Going down a column:
add the top number each time.

Odd × odd is odd:
3 × 5 = 15, 7 × 9 = 63.

Double a number, double the answer

$3 \times 6 = 18$

$6 \times 6 = 36$

6 is double 3,
so 36 is double 18.

Your turn!
