Mixed Numbers

Whole ones and pieces: 1 3/4 means 1 whole and 3/4.

7/4 is 1 whole and 3/4 more

$$\frac{7}{4} = 1\,\frac{3}{4}$$

Say: one and three fourths.

Back to a fraction: count all the pieces

$$2\,\frac{1}{3} = \frac{3}{3} + \frac{3}{3} + \frac{1}{3} = \frac{7}{3}$$

Each whole is 3 thirds: 2 wholes are 6 thirds, plus 1 more is 7 thirds.

Add: wholes with wholes, pieces with pieces

$$2\,\frac{1}{5} + 1\,\frac{3}{5} = 3\,\frac{4}{5}$$

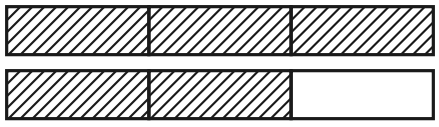

$$1\,\frac{3}{4} + 2\,\frac{2}{4} = 3\,\frac{5}{4} = 4\,\frac{1}{4}$$

5/4 is another whole and 1/4.

Take away the same way

$$3\,\frac{4}{6} - 1\,\frac{1}{6} = 2\,\frac{3}{6}$$

Your turn!

$$\frac{5}{3} = \boxed{1}\,\frac{\boxed{2}}{3}$$

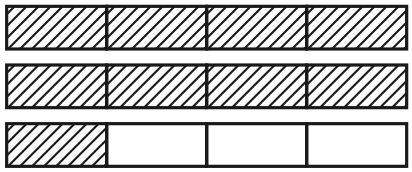

For teachers

Goal: mixed numbers with the same bottom number: rename, add and subtract (4.NF.3c). Say "How many whole bars? How many pieces left over?" Add the wholes, then the pieces.

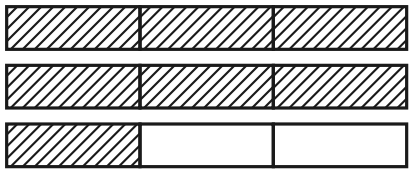

Mixed Numbers: Practice

Whole ones first, then the pieces.

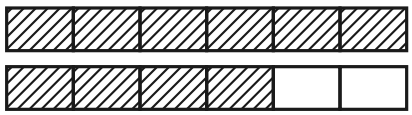

Part 1 Write the mixed number Count the pieces, then the whole bars.
