Tenths and Hundredths

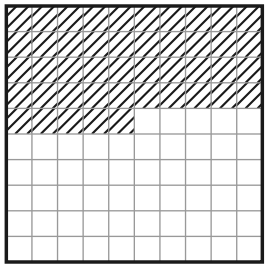

Cut one whole into 10 or 100 equal parts. Write it as a decimal.

Tenths

$\frac{3}{10} = 0.3$ three tenths

Hundredths

$\frac{45}{100} = 0.45$

45 hundredths: 4 full rows (tenths) and 5 more squares.
The first digit after the point is tenths, the second hundredths.

A tenth is 10 hundredths

$\frac{3}{10} = \frac{30}{100}$

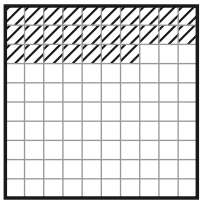

So you can add them: $\frac{3}{10} + \frac{45}{100} = \frac{75}{100}$

Money works the same way

3 dimes and 4 pennies: $0.34

Your turn!

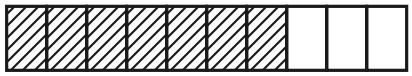

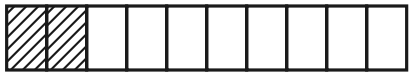

$\frac{\square}{100} = \square$
