Area and Perimeter Formulas

Area: length × width. Perimeter: all the way around.

A rectangle 8 m long and 5 m wide

Area: 8 × 5 = 40 sq m

Perimeter: 8 + 5 + 8 + 5 = 26 m

or 2 × 8 + 2 × 5 = 26: two long sides, two short.

Find a missing side from the area

8 cm × ? cm = 48 sq cm

48 ÷ 8 = 6, so the width is 6 cm.

Find a missing side from the perimeter

Perimeter 30 ft, length 9 ft.
The two lengths are 18 ft, so the two widths are 30 minus 18 = 12 ft.
One width is half of 12: 6 ft.
