Fractions as Division

Share wholes equally: each share is a fraction.

3 pizzas shared by 4 kids

Cut every pizza into 4 pieces.
Each kid gets 1 piece of each pizza:
3 pieces of 1/4. That is 3/4.

$$3 \div 4 = \frac{3}{4}$$

The top is shared by the bottom

$$2 \div 5 = \frac{2}{5} \qquad 5 \div 2 = \frac{5}{2}$$

The fraction bar means "shared by".

More than one each: 7 ÷ 3

$$7 \div 3 = \frac{7}{3} = 2\,\frac{1}{3}$$

Each kid gets 2 whole ones,
then the last one is cut in 3.

Your turn!

$$4 \div 5 = \frac{4}{5}$$

For teachers

Goal: a fraction is a division (5.NF.3). Share real things: 3 pizzas among 4 kids. Say "How many wholes? How many people? Each gets top over bottom."
