Classifying Shapes

A square is a rectangle, a rhombus and a parallelogram too.

The quadrilateral family

Triangles by their sides

Your turn!

quadrilateral parallelogram rectangle rhombus square

For teachers

Goal: sort shapes into families and name every name that fits (5.G.3–4). Say "What does it have? Then it gets that name, and every name above it." Tick marks show equal sides.

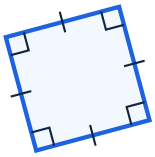

Classifying Shapes: Practice

A shape gets every name that fits.

Part 1 Every name that fits Circle all the names. Right-angle marks and ticks tell you what is equal.

1) 

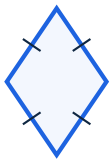

(quadrilateral) (parallelogram) (rectangle) rhombus square

2) 

(quadrilateral) (parallelogram) (rectangle) (rhombus) (square)

3) 

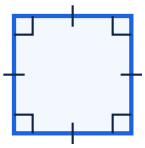

(quadrilateral) (parallelogram) rectangle rhombus square

4) 

(quadrilateral) (parallelogram) rectangle (rhombus) square

5) 

(quadrilateral) parallelogram rectangle rhombus square

6) 

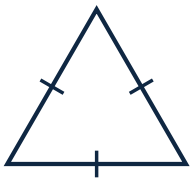

(quadrilateral) (parallelogram) (rectangle) (rhombus) (square)

7) 

(quadrilateral) parallelogram rectangle rhombus square

Classifying Shapes: Practice (continued)

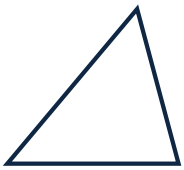

Part 2 Triangles by their sides Tick marks show equal sides. Circle one.

8) 

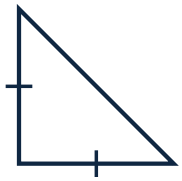

equilateral isosceles scalene

9) 

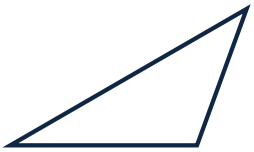

equilateral **isosceles** scalene

10) 

equilateral isosceles **scalene**

11) 

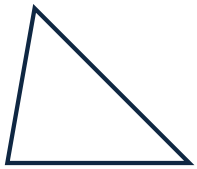

equilateral **isosceles** scalene

12) 

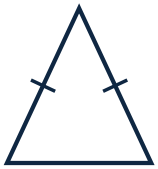

equilateral isosceles **scalene**

13) 

equilateral isosceles **scalene**

14) 

equilateral isosceles **scalene**

15) 

equilateral **isosceles** scalene

Part 3 True or not? Circle yes or no.

16) **Every square is a rectangle.** **yes** no

17) **Every rectangle is a square.** yes **no**

18) **A trapezoid is always a parallelogram.** yes **no**

Classifying Shapes: Practice (continued)

Part 3 True or not? (continued)

19) **Every rhombus is a parallelogram.** (yes) no

20) **A square is a rhombus.** (yes) no

21) **Every parallelogram has 4 right angles.** yes (no)

22) **An equilateral triangle is also isosceles.** (yes) no

23) **A scalene triangle has 2 equal sides.** yes (no)

24) **A rhombus always has right angles.** yes (no)

25) **A parallelogram has 2 pairs of parallel sides.** (yes) no

26) **A triangle can have 2 right angles.** yes (no)

27) **Every quadrilateral has 4 sides.** (yes) no

Classifying Shapes: Practice (continued)

Part 4 Name it No help this time. Write the best name.

28) 4 sides, 4 right angles, all sides equal: square

29) 2 pairs of parallel sides, no right angles, sides not all equal: parallelogram

30) 3 sides, all different lengths: scalene

31) 4 equal sides, no right angles: rhombus

32) 3 sides, exactly 2 the same length: isosceles

33) 4 right angles, long and short sides: rectangle

34) 3 equal sides: equilateral

Part 5 Triangles by their sides Circle one.

35) 

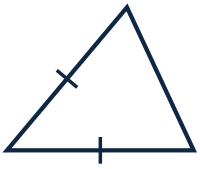

equilateral
(isosceles)
scalene

36) 

equilateral
(isosceles)
scalene

37) 

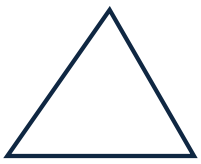

equilateral
isosceles
(scalene)

38) 

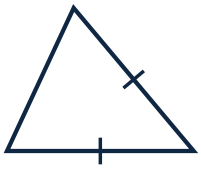

equilateral
(isosceles)
scalene

Classifying Shapes: Practice (continued)

Part 5 Triangles by their sides (continued)

39) 

equilateral
isosceles
scalene

40) 

equilateral
isosceles
scalene

41) 

equilateral
isosceles
scalene

42) 

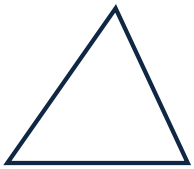

equilateral
isosceles
scalene

43) 

equilateral
isosceles
scalene

44) 

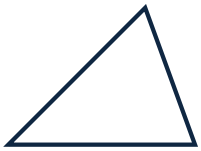

equilateral
isosceles
scalene

45) 

equilateral
isosceles
scalene

46) 

equilateral
isosceles
scalene

47) 

equilateral
isosceles
scalene

48) 

equilateral
isosceles
scalene

49) 

equilateral
isosceles
scalene

50) 

equilateral
isosceles
scalene

Classifying Shapes: Practice (continued)

Part 6 Remember? Problems from earlier packets.

51) (4, 2) to (4, 9): 7 apart

52) Start at 1, add 8: 1 9 17

53) 6.5 cm = 65 mm

54) (30 + 6) ÷ 9 = 4

55) $\frac{1}{9} \div 2 = \frac{1}{18}$

56) $7 \times \frac{1}{2} = \frac{7}{2}$

Part 7 Shape riddles Who am I?

57) I have 4 right angles and 2 pairs of parallel sides, but my sides are not all equal.

Number sentence 4 right angles, 2 pairs of parallel sides

Answer rectangle

Draw or show your work

58) I am a triangle. Two of my sides are the same length and one is different.

Number sentence 2 equal sides

Answer isosceles

Draw or show your work

59) I have 4 equal sides and 4 right angles. Name me with the best name.

Number sentence equal sides and right angles

Answer square

Draw or show your work

Classifying Shapes: Practice (continued)

Part 7 Shape riddles (continued)

60) I have 4 equal sides but no right angles. My opposite sides are parallel.

Number sentence equal sides, no right angles

Answer rhombus

Draw or show your work

61) Challenge: I am a right triangle, and my two short sides are equal. What am I by my sides?

Number sentence a right triangle with 2 equal sides

Answer isosceles

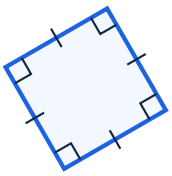

Draw or show your work

Check-In: Classifying Shapes

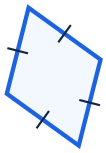

Show what you know. No help this time.

Mastery: 5 of 6 (80%)

Part 1 Every name that fits Circle all the names.

1) 

(quadrilateral) (parallelogram) (rectangle) (rhombus) (square)

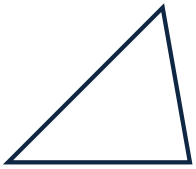

2) 

(quadrilateral) (parallelogram) rectangle (rhombus) square

Part 2 Triangles by their sides Circle one.

3) 

equilateral
(isosceles)
scalene

4) 

equilateral
isosceles
(scalene)

Part 3 True or not? Circle yes or no.

5) **A rectangle can have 4 equal sides.**

(yes)
no

6) **An isosceles triangle has 3 different sides.**

yes
(no)
