Halves, Thirds and Fourths

Equal shares are the same size.

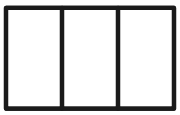

Fair to share? The shares must be the same size.

Name the shares

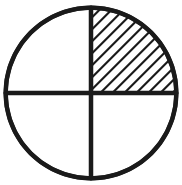

1 half

2 halves make
1 whole

1 third

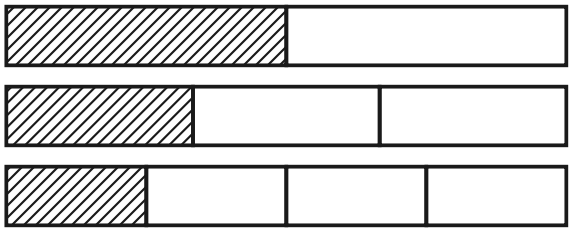

3 thirds make
1 whole

1 fourth

4 fourths make
1 whole

More shares, smaller shares

1 half

1 third

1 fourth

Cut the same bar
into more shares:
each share gets smaller.

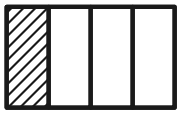

Halves can look different

Each square is cut in half.
Each shaded part is 1 half.

Your turn!

Shade 1 fourth.

4 fourths make 1 whole

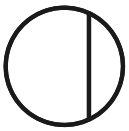

For teachers

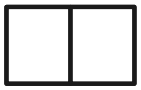

Goal: cut shapes into 2, 3 or 4 equal shares and name them (2.G.3). Ask “Are the shares the same size?” before naming them. Say “the more shares, the smaller each share,” so 1 fourth is smaller than 1 half. No fraction numbers (½) yet.

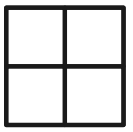

Halves, Thirds and Fourths: Practice

Equal shares first. Then name them.
