Multiplication Strategies

Break a hard fact into facts you know.

6 × 7: 5 rows and 1 more row

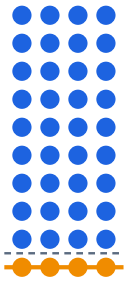

$5 \times 7 = 35$

$1 \times 7 = 7$

$35 + 7 = 42$

×5 is easy: half of ×10.
Then add one more row.

9 × 4: 10 rows, then take one away

$10 \times 4 = 40$

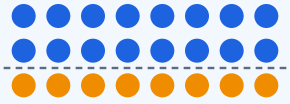

$40 - 4 = 36$

The crossed-out row
is the group taken away.

A strategy for every fact

- **×3** = ×2 and one more group
- **×4** = double, then double again
- **×6** = ×5 and one more group
- **×7** = ×5 and ×2
- **×8** = ×4, then double
- **×9** = ×10, take one group away
