Area

Area is how many squares cover a shape.

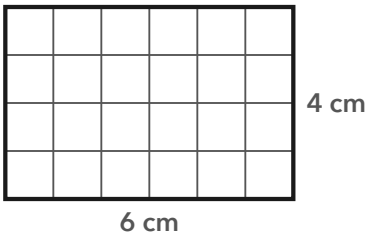

Cover it with squares, then count

Area = 15 square units

Each square is 1 square unit.

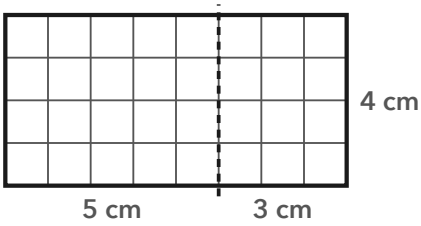

Rows × columns: no need to count one by one

4 × 6 = 24

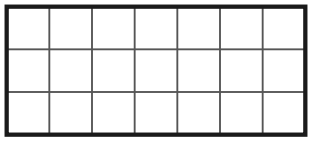

4 rows of 6 squares: 24 square cm.
Multiply the side lengths.

Break it apart: 4 × 8 is 4 × 5 and 4 × 3

4 × 5 = 20
4 × 3 = 12
20 + 12 = 32 square cm
