Answer Key

Unit Fractions

Cut one whole into equal parts. One part is a unit fraction.

1 whole, 4 equal parts

$\frac{1}{4}$

1 part shaded

4 equal parts in the whole

Say: one fourth.

The parts must be equal

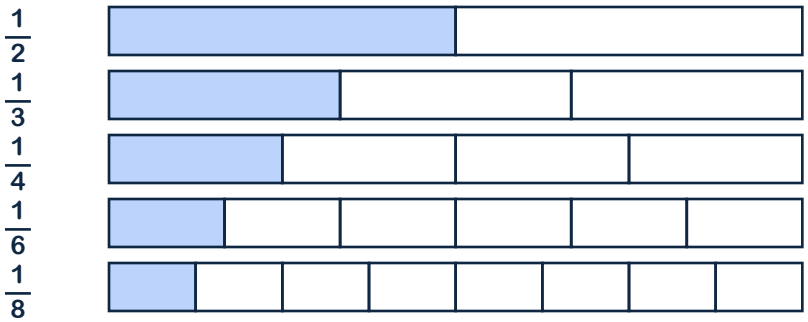

Equal parts: 1/4

Not equal: not fourths

Same size pieces?
Then each one is 1/4.

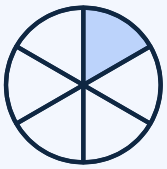

More parts, smaller pieces

Same whole bar.
Cut it into more parts,
and each piece is smaller.

$\frac{1}{2}$ is bigger than $\frac{1}{8}$

Your turn!

$\frac{1}{6}$

How many equal parts?

For teachers

Goal: 1/b is one of b equal parts of a whole (3.NF.1, 3.G.2). Say "How many equal parts? That's the bottom number. One part is one fourth." Check the parts are equal first. More parts means smaller pieces.
