Fractions and Wholes

All the pieces make 1 whole. More pieces go past 1.

All the pieces: 1 whole

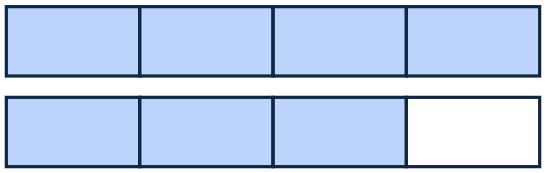

$\frac{4}{4} = 1$

$\frac{6}{6} = 1$

Top and bottom the same? Then it's 1 whole.

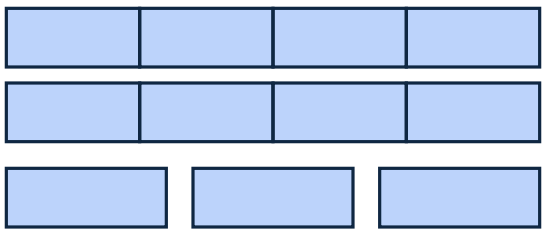

More than 1 whole

$\frac{7}{4} = 1$ whole and $\frac{3}{4}$

Count on past 4/4: 5/4, 6/4, 7/4.

Whole numbers are fractions too

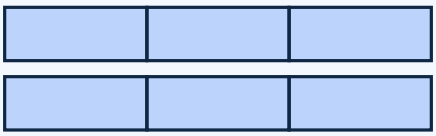

$\frac{8}{4} = 2$

8 fourths fill 2 bars.

$\frac{3}{1} = 3$

3 pieces, each a whole.

Your turn!

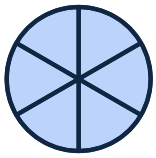

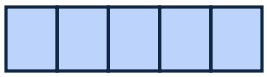

$\frac{\square}{3} = \square$
