Equal Fractions

Different pieces, same amount.

The fraction wall

Follow the dashed line:

$$\frac{1}{2} = \frac{2}{4} = \frac{3}{6} = \frac{4}{8}$$

Same length, so they are equal fractions.

Cut every piece in two

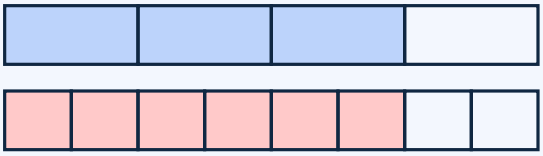

$$\frac{1}{3} \quad \frac{2}{6}$$

Twice as many pieces, each half as big.

$$\frac{1}{3} = \frac{2}{6}$$

Your turn!

$$\frac{3}{4} = \frac{\boxed{6}}{8}$$

For teachers

Goal: equal fractions name the same amount of the same whole (3.NF.3a–b). Line the strips up: "Is the shaded part the same length?" Cutting every piece in two doubles the top and the bottom.

Equal Fractions: Practice

Same whole, same amount shaded: the fractions are equal.

Part 1 Same amount? Same whole. Is the same amount shaded? Circle yes or no.

1) $\frac{1}{2}$  $\frac{3}{6}$  (yes) no

2) $\frac{2}{3}$  $\frac{3}{4}$  yes (no)

3) $\frac{1}{4}$  $\frac{2}{8}$  (yes) no

4) $\frac{3}{5}$  $\frac{6}{10}$  (yes) no

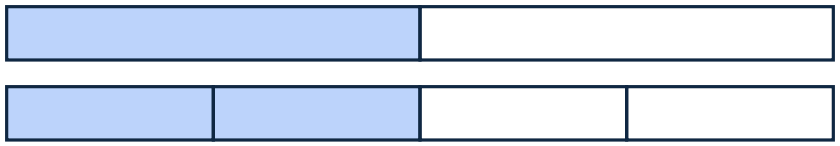

5) $\frac{2}{6}$  $\frac{1}{4}$  yes (no)
