Comparing Fractions

Same whole? Then look at the pieces.

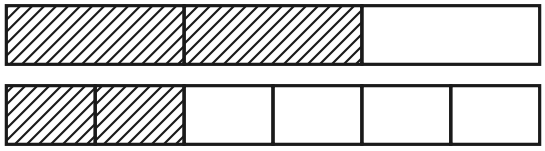

Same bottom number: same size pieces

$\frac{3}{8} < \frac{5}{8}$

More pieces of the same size is more.

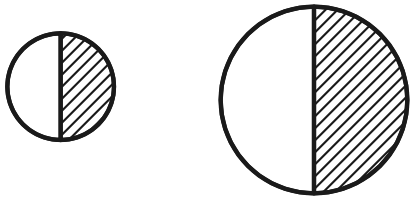

Same top number: look at the size

$\frac{2}{3} > \frac{2}{6}$

Same number of pieces, but thirds are bigger.

Only compare the same whole

Half of a small pizza is less than half of a big pizza.

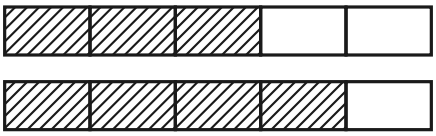

Compare fractions of the same whole.

Equal? The strips line up.

$\frac{2}{4} = \frac{1}{2}$

Use the fraction wall from Equal Fractions.

Your turn!

$\frac{3}{5}$ [<] $\frac{4}{5}$

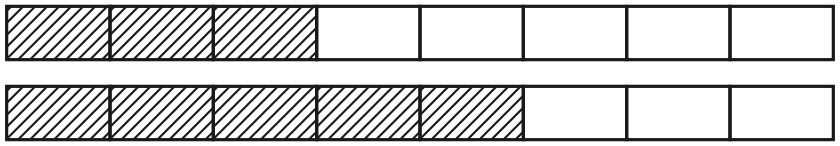

For teachers

Goal: compare two fractions of the same whole with <, > or = (3.NF.3d). Ask "Same size pieces? Then who has more pieces?" or "Same number of pieces? Then whose pieces are bigger?"
