Fractions of a Group

Share the group into equal parts, then count the parts you need.

1/3 of 12: make 3 equal groups

$\frac{1}{3}$ of 12 = 4

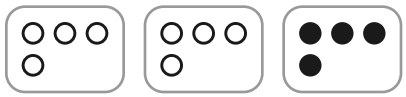

One group out of 3.

Think division

$12 \div 3 = 4$

The bottom number tells how many groups.

2/3 of 12: two of the groups

$\frac{2}{3}$ of 12 = 8

4 + 4 = 8, two groups.

The steps

1. Divide by the bottom number: that's one group.
2. Times the top number: that many groups.

$\frac{3}{4}$ of 20: $20 \div 4 = 5$, $3 \times 5 = 15$

Your turn!

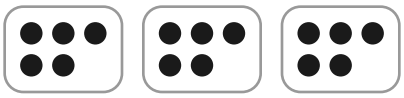

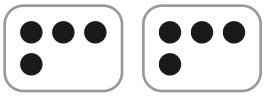

$\frac{1}{4}$ of 8 = ☐
