Mass and Liquid Volume

How heavy is it? How much does it hold?

Grams for light things, kilograms for heavy things

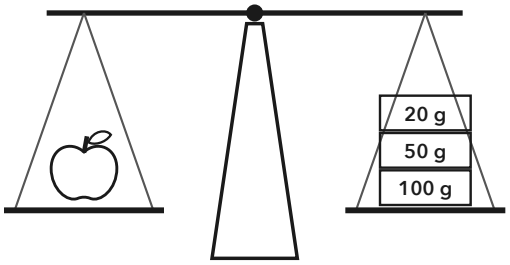

A paper clip is about 1 gram (g).

1 kilogram = 1000 grams

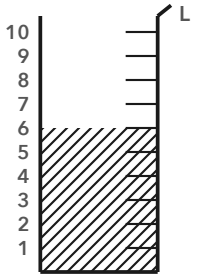

The pans are level: they weigh the same.

Read the balance: add the weights

100 + 50 + 20 = 170 g

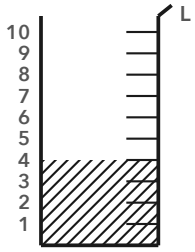

Read the beaker: count the marks

6 liters (L)

Each mark is 1 liter.

Your turn!
